

Check the transaction completion (new user interface)

Version 1: 01.02.2024

Each transaction is completed with different timing based on its type: surrender, return deletion and cancellation are completed immediately after approval, while for transfers there are different possibilities depending on whether they are transfers to accounts in the Union Registry, the Swiss Registry or between Kyoto accounts (for further information, visit the relevant links available on the page [Transactions](#) of the ARIET website).

In any case, it is always advisable to check that the transaction was completed successfully and not **terminated** (due to failure to pass checks or to technical problems). Completion of the transaction involves a change in the account balance and can be checked by following the instructions in this tutorial.

Follow the instructions in the table to check completion
